Science Project Brainstorm Ideas—For Accelerated 6th and 7th grade and 8th grade Physical Science Honors

Directions: Research some possible ideas that you would be interested in for your science project this school year. List these ideas on the left side with a brief description. (You do not need all 7, but try to have at least 5 possibilities.) Remember, your ideas should have a testable hypothesis. Next, narrow down your list to three choices and record these on the right side. Try to find out more information about these three ideas and think about what is most interesting to you and what you can realistically accomplish as a project. Talk to your parents, too! Then, pick your favorite and record it in the box. Bring this to your science teacher the first week of school!
