Agriculture, Food, and Natural Resources

Transportation, Distribution, and Logistics

Finance

Law, Public Safety, Corrections, and Security

Information Technology

Science, Technology, Engineering, and Mathematics

Business Management and Administration

Government and Public Administration

Architecture and Construction

Hospitality and Tourism

Education and Training

CAREER EXPLORATION

It is easier to choose from many options when they are organized in some way. So, occupations in our system are first divided into six very large groups. Then, each of those groups is divided into smaller groups.

6 CAREER FIELDS

The career fields are the six large groups. They include all of the occupations in the United States, and their titles tell you something about the focus of work in that group of occupations.

16 NATIONAL CAREER CLUSTERS

Each of the six career fields is divided into 1-4 sub-groups, called clusters. Each cluster is made up of a number of occupations and post-secondary majors related to the specialty of that cluster. The results of your interest and skills assessments are linked to these same clusters.

PATHWAYS

Each cluster is broken down into pathways. A pathway is made up of a group of occupations that focus on a specialty within a cluster. Your score report on both the interests and skills assessments identifies the five pathways (out of 79) of your highest interest or skill.
